New! EnLyte PD Gummy

Addressing complex ADHD symptoms naturally and safely by targeting its root causes — genetic, biochemical, and structural.

Medical Food

Specially Formulated for Ages 2-8

EnLyte PD™ gummy is a children's gummy with a delicious strawberry taste, made from real strawberries. EnLyte PD™ includes many of the same clinically proven ingredients as regular EnLyte, with slight adjustments to its formula to better meet the needs of younger patients with ADHD and associated psychiatric comorbidities.

EnLyte PD™ normalizes and balances dopamine and norepinephrine — neurotransmitters involved in attention, learning, and mood — helping promote emotional stability, focus, and enhanced cognitive function.

Did you Know?

Up to 75% of individuals with ADHD have a common genetic variation known as MTHFR, which can cause a wide range of symptoms. While hyperactivity, inattention, and difficulty focusing are well-known ADHD symptoms, **many children also experience irritability, disruptive behavior, sleep challenges, anxiety, and depression.**

EnLyte PD™ Gummy supports the **full spectrum** of ADHD-related symptoms.

Key Benefits

- ✓ MTHFR Formulated
- ✓ Manage ADHD Naturally
- ✓ General Nutritional Benefits
- ✓ No Rx Needed

EZ-Chew!
