

DESCRIPTION: EnLyte® Gummy Plus is a prescription multivitamin/multimineral supplement specially formulated with active folates, vitamin B12, and omega-3s to support brain health, methylation, emotional well-being, focus, and overall mental wellness.†

PRECAUTIONS: Folate doses above 0.1 mg per day may mask vitamin B12 deficiency by improving hematological symptoms, such as those seen in pernicious anemia, without addressing neurological complications. L-methylfolate is believed to have a lower risk of masking B12 deficiency than folic acid. Folate therapy alone is inadequate for the treatment of a vitamin B12 deficiency.

ADVERSE REACTIONS: Allergic reactions have been reported with oral folate supplementation. Mild, transient diarrhea, itching, rash (exanthema), and generalized swelling have been associated with vitamin B12 use.
