New! EnLyte Gummy+ with Leucovorin

Addressing complex ADHD symptoms naturally and safely by targeting its root causes — genetic, biochemical, and structural.

Medical Food

Specially Formulated for Ages 2-8

EnLyte Gummy is a children's gummy with a delicious strawberry taste, made from real strawberries. EnLyte Gummy includes most of the same clinically proven ingredients as regular EnLyte, with slight adjustments to its formula to better meet the needs of younger patients with ADHD and associated psychiatric comorbidities.

EnLyte Gummy normalizes and balances dopamine and norepinephrine — neurotransmitters involved in attention, learning, and mood — helping promote emotional stability, focus, and enhanced cognitive function.

Did You Know?

Up to 75% of individuals with ADHD have a common genetic variation known as MTHFR, which can cause a wide range of symptoms. While hyperactivity, inattention, and difficulty focusing are well-known ADHD symptoms, **many children also experience irritability, disruptive behavior, sleep challenges, anxiety, and depression.**

Now with Leucovorin

Leucovorin is a ready-to-use form of folate, a B vitamin your body needs every day. It supports brain function, healthy DNA production, and the making of neurotransmitters, the chemical messengers your nerve cells use to communicate.

Key Benefits

- ✓ MTHFR Formulated
- ✓ Manage ADHD Naturally
- ✓ General Nutritional Benefits
- ✓ No Rx Needed

EZ-Chew!

Safe Ingredients

Each EnLyte Gummy Contains:

L-Methylfolate (Magnesium):1.0 mg
Leucovorin (Folinic Acid):1.0 mg
