

ASD

AUTISM SPECTRUM DISORDER

What is EnLyte PD Gummy?

EnLyte PD is an all-natural children's gummy with an excellent strawberry taste, derived from real strawberries and easy to chew. EnLyte PD normalizes brain chemistry, which manages the core causes and symptoms associated with Autism Spectrum Disorder.

Clinically Proven

EnLyte PD Gummy is a complete broad-spectrum methylfolate, B vitamin coenzyme, mineral cofactor and PS omega formula proven to normalize folate metabolism - no matter the cause of its deficiency.

B Vitamin coenzymes are essential for normal brain development and abnormalities in the folate related pathways have been identified in children with autism spectrum disorder.

One of the most promising treatable disease targets in autism spectrum disorder is abnormalities in folate metabolism.

Richard Frye MD, Treatment of folate metabolism abnormalities in autism spectrum disorder, Seminal Pediatric Neurology, 2020

Safe Ingredients

EnLyte PD contains all-natural ingredients and is free from major allergens, including soy, gluten, dairy, eggs, peanuts, tree nuts, sesame, and shellfish. It contains no artificial colorants, sweeteners, flavors, or preservatives.
